

## Cutting Blade Sharpening Machine - LC G250

The **LC G250 Cutting Blade Sharpening Machine** is a high-precision grinder engineered for sharpening tungsten steel blades used in PCB cutting machines. With a fully enclosed design for dust collection, it ensures clean operation, precise sharpening, and excellent consistency using a diamond grinding wheel. Ideal for industrial applications where efficiency, noise control, and safety are paramount.

### Specifications:

<b>Model</b>	LC G250
<b>Angle of sharpening</b>	18° - 25°
<b>Dimension of blade</b>	Max. Ø 250
<b>Speed of blade revolving</b>	2500 RPM
<b>Grinding Wheel Type</b>	Diamond Wheel
<b>Power supply</b>	AC 220V, 50Hz
<b>Weight</b>	120 Kg

### Features:

- Specialized for sharpening tungsten steel blades used in PCB lead cutting.
- Fully enclosed design enables dust-free operation and easy dust collection.
- High-precision diamond grinding wheel ensures accurate and consistent results.
- Adjustable grinding angle and smooth-speed operation for high efficiency.
- Low noise and minimal vibration for enhanced operator comfort and safety.

**ERGONOMIC AND VERSATILE, TRUSTED BY PROFESSIONALS**
