

Automatic Dip-soldering Machine – 14" X 18"

The DIP 905 dip-soldering machine is equipped with a **digital temperature controller** and **electronic timer**, enabling precise control over the solder bath temperature and dwell time. Its **mechanically adjustable depth setting** ensures flexible operation to meet varied PCB requirements. This machine comes with a **versatile PCB carrier**, allowing simultaneous soldering of multiple boards with uniform quality and minimal manual handling.

Specifications:

Bath Size	14" X 18"
Solder Capacity	35 Kg
Power Supply	Power Supply
Temperature range	Upto 300°C
Heater Power	4.2 KW
Heat up Time	35 min
Bath Depth	50 mm
Dimensions	790 X 460 X 360 mm
Weight (without solder)	50 Kg
Standard Accessories	PCB Carrier-1 NOS Scraper – 1 NOS L/N Key Kit-1 NOS

Features:

- Digital Temperature Controller for accurate solder bath control
- Electronic Timer for setting dwell (solder) time
- Easy mechanical adjustment for soldering depth
- Versatile PCB Carrier for holding multiple PCBs simultaneously

ERGONOMIC AND VERSATILE, TRUSTED BY PROFESSIONALS
