

PCB Separator 6 Blade – EMS 1200 V CUT

Description:

The PCB **Separator 6 Blade** is a compact, high-precision machine for cleanly separating printed circuit boards (PCBs). Ideal for high-volume production, it offers adjustable cutting speeds up to 20 m/min and supports straight-line cuts for PCBs up to 30 mm thickness. It ensures reliable performance and minimal component stress.

Specifications:

Model	EMS 1200 V CUT
Cutting Speed	20 m/min
Cutting Path	Straight Line
Max PCB Thickness	3 mm
Blade Dimensions	ID: 16 mm OD: 55 mm Thickness: 2 mm
Power Consumption	220V AC, 50Hz
Dimensions	2430 x 375 x 280 mm
Weight	50 Kg

Key Features:

- **High-Speed Cutting:** Up to 20 m/min for efficient PCB processing.
- **Precise Straight-Line Cuts:** Clean separation with minimal component stress.
- **Versatile:** Handles PCBs up to 3 mm thick.
- **Compact & Durable:** Fits small spaces, built for industrial use.
- **Adjustable Speed:** Customizable for various PCB types.
- **User-Friendly:** Intuitive controls with safety features.

ERGONOMIC AND VERSATILE, TRUSTED BY PROFESSIONALS
